This is a review on uCertify's Network+ Prepkit available over at www.ucertify.com. The uCertify Prepkit is a quick download from their site. Once you install it on your computer, you have access to the demo version which gives you some practice questions and limited use of the Prepkit. Upon buying the full Prepkit, you will be sent a license key that will unlock all the questions and features. Now you can get started learning. Some of the major advantages with the Network+ Prepkit is the fact that it is more than just a simple study guide.

Inside the Prepkit you will find:

- Diagnostic test
- 7 large Practice tests
- Final exam, an Adaptive test
- Ability to create customer tests
- Interactive quiz with 154 questions
- Study notes
- Flash cards
- Articles
- Ability to track your Progress

I recently reviewed the Security+ PrepKit from uCertify and was asked to review the Network+ Guide also. I decided this time I would put it to the test by getting 2 free copies of the PrepKit and having some associates try their hands at the actual CompTIA Network+ Exam. I figured the only real way to test the quality of the PrepKit was to put it to use with 2 people that I knew wanted to study for the CompTIA exam. I recruited the 2 subjects and asked that they only use the uCertify PrepKit to study for there exams. Now I already felt impressed about uCertify's guides (based on my recent review of the Security+ guide), but it was now time to see how it would fair in a live test.

The 2 subjects sat for the exam and both passed with decent scores. I do want to add that both of the test subjects had over 3 years of networking experience. With their experience and the uCertify Network+ PrepKit, they were able to pass the exam and attain the CompTIA Network+ certifications. I would also like to note that this was the first IT Certification that either of the two candidates had ever attempted. With the proof on the table, I have to endorse the uCertify Network+ PrepKit as it has proven itself to be the right study guide to pass the Network+ Exam.
